

Comprehensive Reporting Tools

Compelling, courtroom-ready format automatically compiled from all AwareABIS functions leveraging our patented Face and Fingerprint Workbench technologies

Reduce report generation time and risk

Open Integration

A rich set of APIs that provide flexibility to integrate AwareABIS with other third-party hardware and systems without sacrificing performance

Leverage your existing systems and infrastructure

Ease of Installation

With support from Aware, AwareABIS can be installed in a fraction of the time of a traditional system

Improve time to productivity

Customer Data Ownership

Biometric data remains under the control of the customer, and in a non-proprietary format

Avoid vendor lock-in

Examiner-Focused User Interface

Move quickly and efficiently through an examination by using a workflow-oriented user interface that is simple, intuitive, and powerful

Increase examiner productivity and reduce the learning curve

Supports Multi-modalities

Fingerprint, palmprint, and latent print with options for face and iris images

Expand without replacement

Supported Law Enforcement Workflows

WORKFLOW 1: Booking

- Modalities: biographic data, fingerprints (tenprint, palms), face
- Includes duplicate check against prior bookings

WORKFLOW 2: Unsolved latent search on every booking

WORKFLOW 3: Latent tenprint / latent palm searches with courtroom reporting

Program Deployment

Aware works closely with you to identify your agency's specific needs and develop a configuration that achieves your goals. Our technical team will collaborate with you to integrate your new AwareABIS with existing systems as required, assist with conversion of legacy data, and provide comprehensive user and administrator training. Support from our unmatched technical team will ensure both a smooth transition and continued dependable, consistent system operation.
