

# Visitor Management

## Enroll and authenticate visitors and employees safely, securely and conveniently

Modern visitor and employee management systems not only need to be secure and convenient for visitors, they need to be safe as well, with as few shared physical touchpoints as possible. Biometrically powered solutions are ideal for any visitor or employee management provider struggling to meet these increasingly difficult requirements.

With Aware's touchless, mobile biometric authentication solutions, visitor and employee management providers can use existing devices or kiosks to conduct biometric matching and liveness detection at check-in, providing a safe, secure and convenient user experience. Aware's industry-leading facial and speaker recognition can be integrated directly into existing systems without the need for a replacement, saving time and money. Aware also provides multiple biometric modalities for its customers—face, voice and iris—providing a great deal of flexibility and customization options without the need to shop around.

# AWARE

**Touchless access.**  
**Workplace confidence.**

## Features

### Contactless Sign-In

Aware's facial and voice recognition is entirely touchless, increasing visitor and employee safety by removing the need for touching shared devices and logbooks. Visitors can present their faces and voices without the touch of a button.

### Frictionless User Experience

Get visitors and employees where they want to go quickly and easily. Aware's password-free facial and voice biometric recognition allows for convenient, frictionless onboarding and authentication, reducing waiting time and improving social distancing.

### Robust Security Measures

Be confident knowing who is visiting the office. Aware's liveness detection provides advanced presentation attack detection algorithms for face and voice, detecting both victim impersonation and identity concealment. Liveness is also entirely passive, ensuring the user experience is not impacted negatively.

### Existing System Integration

Aware's mobile biometric frameworks can be integrated directly into an existing visitor or employee management system, providing market-leading biometric functionality without the need for a full system replacement and costly hardware upgrades.

## Use Cases and Options
